## Frontend Developer

Morocco • +212719439303 • zahiraelmahjour06@gmail.com • [Portfolio](#) • [GitHub](#) • [LinkedIn](#)

---

### OBJECTIVE

---

Passionate and self-motivated frontend developer seeking a remote internship or junior role where I can contribute to real projects and grow professionally. I bring solid hands-on experience in HTML5, CSS3, JavaScript, and Bootstrap — with 4 independently built and deployed projects and one real-world internship at OCP S.A. Currently in my final year of Full Stack Web Development at OFPPT, I am eager to learn fast, take on challenges, and deliver quality work in a remote team environment.

### EXPERIENCE

---

#### Full Stack Developer Intern — OCP S.A. Khouribga

March 2026 · 1 month

Service Support et Coordination · On-site

- Built a full-stack internship management platform to replace manual Excel/Access workflows across the department.
- Implemented automated PDF generation for convocations & attestations in OCP branding, bulk printing, and Excel import.
- Developed advanced search/filter, role-based authentication, and an admin dashboard with live statistics.
- Supervisor expressed interest in adopting the system for real departmental operations.

**Stack:** *Laravel 12 · PHP 8.5 · MySQL · Bootstrap 5 · DomPDF · Maatwebsite Excel*

### PROJECTS

---

#### Gestion Stagiaires — Internship Management Platform

Full-stack internal tool built during OCP internship. Digitalized the entire internship lifecycle — from registration to attestation — replacing copy-paste and double data entry. Features auto-numbered PDFs, bulk print, Excel import, advanced filters, soft deletes, and admin management. Internal tool — live demo available on request.

**Stack:** *Laravel 12 · PHP 8.5 · MySQL · Bootstrap 5 · DomPDF · Maatwebsite Excel*

#### Floriva — Floral E-Commerce Website [Live Demo ↗](#) | [GitHub ↗](#)

Fully responsive e-commerce platform with 24+ products, dynamic shopping cart, wishlist, and product filtering — built entirely in vanilla JavaScript with zero frameworks. Completed under a self-imposed one-month deadline.

**Stack:** *HTML5 · CSS3 · Bootstrap 5 · JavaScript*

#### MindNest — Mindfulness Bookstore [Live Demo ↗](#) | [GitHub ↗](#)

Dynamic bookstore where all content (books, pricing, themes) loads from a local JSON structure — no hardcoded data. JavaScript drives instant UI updates on user selection. Completed under a self-imposed one-month deadline.

**Stack:** *HTML5 · CSS3 · Bootstrap 5 · JavaScript*

#### TerraVita — Travel Inspiration Platform [Live Demo ↗](#) | [GitHub ↗](#)

Seasonal travel platform with destination categorization by season, smooth scroll navigation, and interactive contact forms. Fully mobile-first responsive design.

**Stack:** *HTML5 · CSS3 · JavaScript*

### TECHNICAL SKILLS

---

#### Frontend

HTML5, CSS3, JavaScript (ES6+), Bootstrap 5

<b>Concepts</b>	Responsive Web Design, DOM Manipulation, Cross-browser Compatibility
<b>Tools</b>	Git, GitHub, VS Code, Netlify
